SYMPLYPRO XTL TAPE LIBRARIES

PRO XTL 80

Enterprise-Class 6U Modular Library for Massive Scalability and Performance

Overview

The SymplyPRO XTL 80 tape library is built on field-proven technology, trusted by some of the world's largest organizations. Designed for seamless integration, the libraries offer a wide range of connectivity options, including SAS, Fibre Channel, Ethernet, and Thunderbolt, ensuring compatibility with your existing infrastructure and leading data protection, backup, and archive software.

Featuring support for the current LTO generations LTO-7, LTO-8, and LTO-9, along with being LTO-10 ready, the XTL 80 allows for easy, on-demand drive and slot upgrades to accommodate growing storage needs. Both the XTL 80 base chassis and expansion modules feature redundant power supplies as standard.

The XTL 80 an Enterprise-Class 6U Library featuring a modular design, simplifying the process of adding both storage capacity and additional LTO drives without the need for costly capacity-on-demand or partitioning licenses.

Manage your SymplyPRO XTL libraries with ease, either through the intuitive touchscreen interface or secure web-based management. Monitor the status of your libraries, update drive firmware, perform diagnostic tests, and access industry-leading technical support – all from anywhere in the world.
